VI、Important Notes :

- (1) For sensitive electronic equipment, please install surge protectors, or shut down and isolate the devices before the scheduled power outage. After power is restored, delay turning on the equipment to ensure safety.
- (2) All buildings and departments are requested to turn off electrical equipment or unplug devices from outlets before the power outage to prevent damage from voltage or current fluctuations when power is restored.
- (3) ★All responsible units must notify their departments and relevant personnel, and post the power outage notice at main entrances and inside elevators of each building.
- (4) Computer and Information Networking Center should prepare uninterruptible power supplies (UPS) for the affected areas to maintain normal system operation.
- (5) The following principles apply if force majeure events, such as typhoons, prevent the scheduled power outage for maintenance:

According to the announcement by the Directorate-General of Personnel Administration (DGPA), Executive Yuan	
DGPA announces a suspension of work.	If the contractor does not perform the work → the power outage will be rescheduled.
DGPA announces normal work schedule	If the contractor proceeds with on-site maintenance → the power outage will generally remain as scheduled.
	However, if on-site assessment shows that maintaining the high-voltage switchgear may allow rain and wind to enter and wet the equipment → the power outage will be rescheduled.

- (6) Campus Security is requested to assist for record-keeping.
- (7) All laboratories should avoid conducting experiments during the power outage or adjust experiment schedules. If unavoidable, please prepare backup power in advance.
- (8) All buildings should restrict elevator use on the day (evening) of the power outage to prevent accidents during the outage.
- (9) All buildings should check the fuel levels of backup power generators before the day of the power outage.
- (10) Student dormitories should strengthen communication regarding the power outage schedule to prevent students from panicking during the outage.
- (11) If there are parking facilities, all buildings and departments should manage vehicle access before the power outage.
- (12) This "Power Outage Notice" is published on the campus bulletin board and announced on PTT-NTUbus as well as the Office of General Affairs homepage.
